6.2 In the event SURFmarket fails to pay any fee due within 30 days following notice from Springer of the non-payment, this will be considered a material breach and Springer may immediately terminate this Agreement without further notice.

6.3 Unless for material breach this Agreement cannot be terminated partly or as a whole by any of the parties. Should any party terminate the Agreement according to this clause the Agreement will be terminated as a whole.

6.4 Immediately upon termination or dissolution of the Agreement, the Institute shall inform the Users of the fact that the User Right in respect of duplicates of the Licensed Material distributed pursuant to this Agreement has been terminated and ensure that the Institute shall immediately desist and refrain from using the Licensed Material in any way.

#### **Clause 7: Text and Data Mining**

##### **Definitions**

"Text and Data Mining" means to perform extensive automated searches of subscribed Content, including data embodied therein (such as images, figures, interactive content and videos), the sorting, parsing, addition or removal of linguistic structures, and the selection and inclusion of subscribed Content into an index or database for purposes of classification or recognition of relations and associations."

"TDM Output" means the result of any Text and Data Mining activity or operation, capable of fixation, reproduction and/or communication in any form, including without limitation the creation of an index, reference, abstract, relative or absolute description or representation of subscribed

Content, an algorithm, formula, metric, method, standard or taxonomy describing or based on subscribed Content, a relational expression or measurement, whether scalable or not, of subscribed Content, extraction, alternative representation or translation, expression or discussion of any extracts from mined subscribed Content, whether in the form of a direct extraction or a representation in any form which is based on subscribed Content.

#### 7.1 Licensed user: TDM

The Institute and its Authorized Users may use all of the subscribed Content under this License Agreement, at no additional cost, in the course and for the purpose of non-commercial research:

- (a) for Text and Data Mining (TDM) by carrying out the following activities: download, extract and index information from the subscribed Content to which the Institute has access under this License Agreement. Where required, mount, load and integrate the results on an internally facing server used for the Institute's text-mining system to evaluate and interpret the TDM Output for access and use by Authorized Users.
- (b) store electronic copies of the subscribed Content as necessary solely to ensure efficient use by Authorized Users in connection with their work on a TDM project and only during the lifetime of any TDM project. Such copies of subscribed Content are not to be redistributed for any purpose or to be used for marketing of the Institute or the Authorized User's research capabilities. This also includes any commercial research capabilities.
- (c) use TDM Output as part of original non-commercial research carried out by Authorized Users and describe or otherwise reproduce extracts and quotations from TDM Output as part of original works of authorship, e.g. research reports, research papers and research articles. Where subscribed Content is embodied, quoted or referred to, or where bibliographic metadata of subscribed Content is displayed, it should be accompanied by a DOI link that points back to the individual full text item of subscribed Content.
- (d) make the results of any TDM Output available on an externally facing server or website as long as this inclusion consists only of a few lines of query-dependent text of individual full text items of subscribed Content (e.g. extracts from articles or book chapters) which shall be in any event shorter than 200 characters or 15 words or 1 complete sentence or limited to bibliographic metadata. In no event shall the TDM Output contain links to access substantial parts of a full-text work or database of subscribed Content beyond the above limitation;
- (e) Subject to sub-clause 1(d) above and clause 2 below, the Institute may for non-commercial purposes communicate the TDM Output whether for internal or external use without creating products that substitute for subscribed Content, provided that the Institute may not make the results or the TDM Output in the form of data sets available to third parties for their use.

#### 7.2. Prohibited uses relating to subscribed Content and TDM Output

- (a) Subject to clause 1 above and unless agreed by separate written agreement, the Institute and its Authorized Users may not engage in activities listed under (b.1 to b.7).
- (b.1) create derivative products or services that would compete with or be substitutable for the Springer's products and services;
- (b.2) extract, develop or use subscribed Content in any commercial activity;
- (b.3) abridge, modify, translate subscribed content, or create any derivative work based on the subscribed Content, except to the extent necessary to make them perceptible on a computer screen to Authorized Users;
- (b.4) allow a third party to harvest any TDM Output, including but not limited to transfer the TDM Output to an internal server;
- (b.5) remove, obscure or modify in any way any copyright notices, other notices or disclaimers as they appear in the subscribed Content;
- (b.6) In the case of TDM at Springer's site: use any robots, spiders, crawlers or other automated downloading programs, algorithms or devices to continuously and automatically search, scrape, extract, deep link, index or disrupt the working of the subscribed Content;
- (b.7) systematically reproduce, retain or redistribute the subscribed Content.
- (c) This clause 2, as well as the restrictions in sub-clause 1(c) to 1(e) shall remain effective and survive termination of this License Agreement, howsoever arising.

### 7.3. Security, Grant of Access Rights, Formats and Delivery Mechanisms

Springer and the Institute agree the following access protocols:

- (a) The Institute shall ensure compliance with Springer's Usage policies and/or Springer's instructions, including security and technical access requirements. TDM may be undertaken on either locally loaded subscribed Content or as mutually agreed.
- (b) Institute shall implement and maintain adequate and effective state of the art data security systems and measures, in line with international industry standards and best practice.
- (c) In the event the Institute collects or otherwise processes or uses personal data, Institute shall expressly obtain consent from the end user or any person that is a beneficiary of applicable data protection laws. Such collection, processing or use shall be limited to the scope of the consent given. Institute shall undertake the appropriate technical and security measures to protect any personal data Institute collects.
- (d) Springer may require the Licensee and Authorized Users to adhere to Springer's policies and/or instructions referred to in clause 3(a) above in carrying out any TDM activities, including, without limitation, in scheduling and staggering them over time.
- (e) Springer does not give any warranty or assurance as to the suitability or availability of Springer's electronic servers and systems for carrying out TDM or extracting TDM Output, nor as to the completeness or accuracy of any downloaded material.

#### **7.4 Breach and Termination**

- (a) **Breach:** In addition to any contractual rights and remedies under the applicable law, Springer shall retain the right to deny access to any Content where the Institute is in breach of any of the conditions of this License Agreement relating to TDM. Where Institute has made available any subscribed Content or has made any resulting TDM Output available to third parties, Springer shall be entitled to terminate rights granted under clause 1 hereof and also to charge the Institute any subscription fee that would have been payable to Springer, had the use in question been agreed.
- (b) **Termination:** Removal of locally-loaded copies of subscribed Content: Upon termination of any TDM grant of rights under clause 4(a) above or upon termination of the entire

---

License Agreement, howsoever arising, the Institute shall procure the destruction of any copies of the subscribed Content if locally loaded for purposes of TDM. No later than 30 days after termination, the Institute shall provide a certificate of destruction signed by an authorized officer of the Institute."

**Publishing and Content Platform Agreement**

**Terms and Conditions for Open Choice Publishing for Authors**

**1. Eligible authors**

Students enrolled or accredited to one of the Institutes and the teaching and research staff employed by or otherwise accredited to one of the Institutes.

In case of articles published by multiple authors, the corresponding author will be the Eligible author. Corresponding author shall be the author who signs the publishing agreement.

Authors are only eligible once they have signed the then current open access publishing agreement with Springer. Currently this agreement refers to the [Creative Commons Attribution License 4.0](#) or the [Creative Commons Attribution Non-Commercial 4.0 license](#) for a few journals which can be seen here:

<https://creativecommons.org/licenses/by/4.0/legalcode>

<https://creativecommons.org/licenses/by-nc/4.0/legalcode>

**2. Eligible Article Types**

The following standards have to be met by the open access articles :

- Articles have to be original and not infringe on any law and/or third party rights and meet ethical standards.
- **OriginalPaper** -- Standard article, usually presenting new results; articles published under this article type may also be referred to as Original Research, Original Article, Original Paper or Research Paper
- **ReviewPaper** -- Standard article, interpreting previously published results.
- **BriefCommunication** -- Short article submitted for rapid publication that exhibits the same structure as a standard article.
- **ContinuingEducation** -- Article forming integral part of further education (usually medical).

**3. Article value**

For the calculation of the fees that SUBMarket shall pay to Springer, the parties agreed on a calculation base using an article processing charge of 2,200 €/article. For the Term of this Agreement the number of Open Choice publications is unlimited for the Institutes.

**4. The parties' obligations**

The parties have the following obligations regarding the Open Choice Publishing:

- \* Springer shall not levy article processing charges directly on Authors who have identified themselves and whose eligibility has been verified;
- \* Springer shall list and include the Institutes in the publishing process, enabling Authors to identify themselves as such;
- \* Institute shall ensure that Authors shall identify themselves as being eligible in the course of the Springer publishing work-flow. In case authors have not identified themselves as being eligible, once an article has been published in a subscription journal, the author is not eligible anymore to publish the article as Open Choice.

- Springer shall provide email notifications to the Institutes each time an Author has identified himself as eligible.
- Institute shall ensure that the Institutes confirm or deny the eligibility of the author. In case Springer does not receive either a confirmation or a denial within 3 business days after Springer has notified the Institute, Springer shall deem the author to be eligible and continue the publishing process.
- The parties might change this identifying process and amend this Agreement accordingly
